

Quick Start Guide

ePresentation Basics

VERSION 4

Updated: 7/17/15

Updates:

- New tools UX
- New slide thumbnails
- New filter types

The ePresentations are a collection of slides for each lesson for teachers to use while leading activities during a lesson. ePresentations contain a variety of slides, including reproductions of pages from the Math Journal and Math Masters, Activity Cards, and all Student Learning Center activities, as well as content that is unique to the ePresentation.

The default EM4 Lesson ePresentation is launched by clicking the **Presentation** button from the Lesson Button Bar on any of the Lesson pages and then clicking on **Play Presentation**.

Teachers can “prep” the slides in the default EM4 ePresentation by using the pen/text tools or eTools associated to a slide to mark up a slide in preparation for class use. All the mark-up prep they made on the slide will be there when they **Play** the ePresentation again, such as during the math lesson.

Note: “Prep” will be available year-to-year if you re-use the same class.

The screenshot shows the Everyday Mathematics website interface for Unit 2, Lesson 2-8. The page title is "Exploration Exploring Addition Tools, Odd and Even Patterns, and Shapes". The left sidebar contains sections for Materials (PRINT), Overview, Before You Begin, Vocabulary, and Additional Materials. The right sidebar features a vertical navigation bar with icons for Overview, Activities, Differentiation, Presentation, Standards, Notes, and Resources. A callout box points to the "Presentation" button, stating "Presentation Open Presentation menu". Another callout box points to the "Play Presentation Launch Editor" button, stating "Play Presentation Launch the default EM4 ePresentation for class instruction or class prep".

Note: Please read the “Customizing ePresentations” Quick Start Guide to learn about how to use the **Launch Editor** function of ePresentations.

Once the button is clicked, a new tab or window appears in your browser with the first slide of the ePresentation open. In this lesson, the ePresentation begins with Mental Math and Fluency.

Slide Title

This is the title of the slide and the activity's name.

Screen Title

This is the title of the screen.

Close

ePresentation
Click to X to close the ePresentation.

Covers

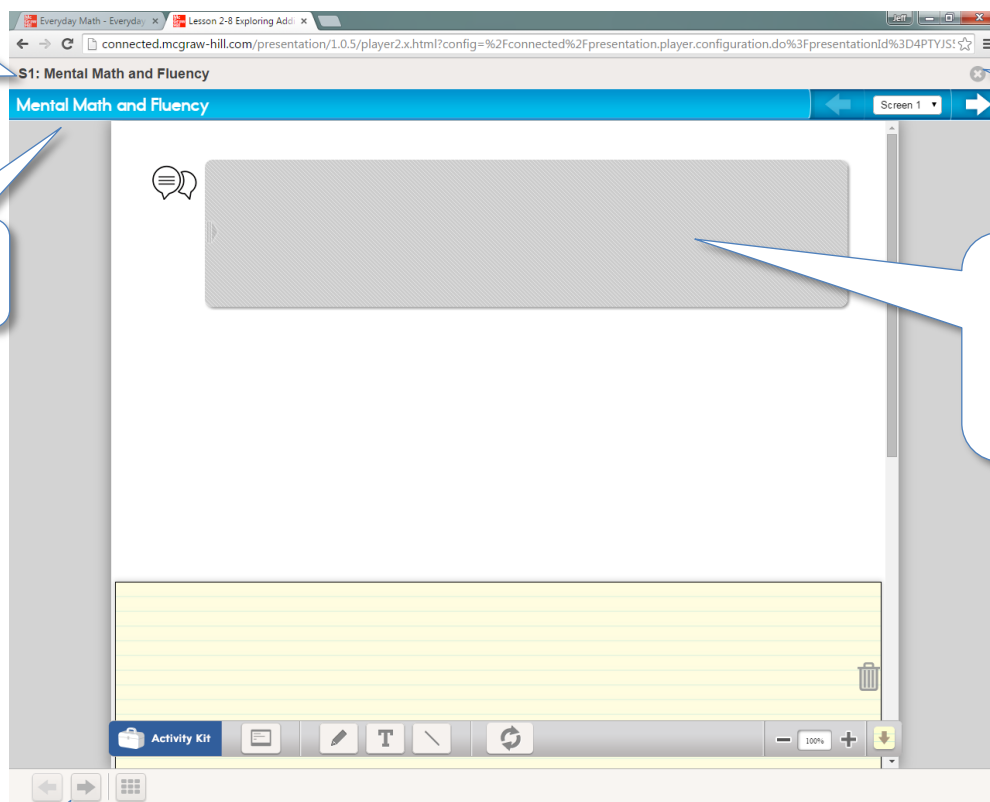

Some slides contain gray covers, which hide content teachers may not want students to initially see.

Slide-to-Slide Navigation

The arrows allow you to navigate to the previous and next slides in the ePresentation.

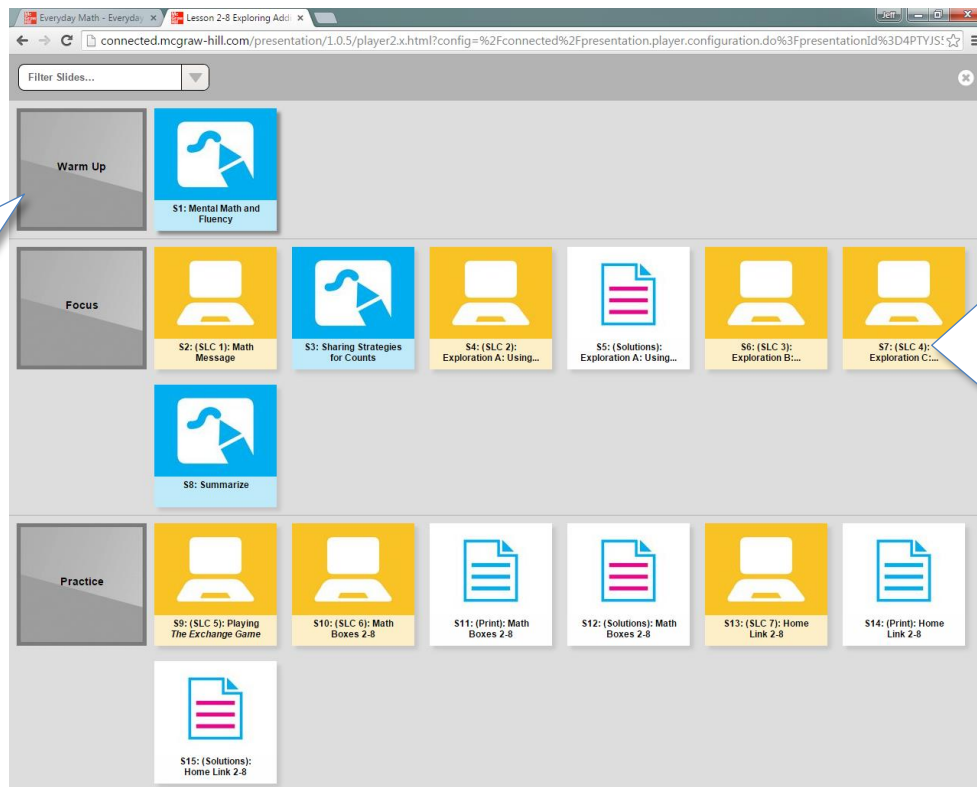

Grid View Button

The grid button takes you to the Grid View, which shows all of the slides in the ePresentation for this lesson.

Grid View

The **Grid View** shows you a comprehensive view of all the slides in the ePresentation.

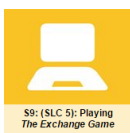

Lesson Sections

The sections are the lesson sections. Slides for the Differentiation Options are found by scrolling down to the bottom of the list.

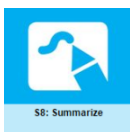

The "S#" is the slide number in the presentation. You'll see this referenced in the Activity View.

(Print) means that this slide shows a print resource page, like a Math Journal or Math Master page.

(SLC#) indicates to which tile in the Student Learning Center this ePresentation slide corresponds.

Yellow thumbnails are slides that show the digital content that students will see in the Student Learning Center.

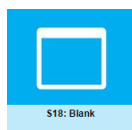

Blue thumbnails are teaching or recording slides used in class instruction that are only found in the ePresentation.

Blue line page thumbnails are slides that show what students would see in their print resources (Math Journal, Math Masters, Activity Cards, etc.) for this activity.

Red line page thumbnails are slides that show student print materials with answers.

Blue Slide thumbnails is a blank slide that allow Teachers to create their own custom content using the pen, text, and line tools.

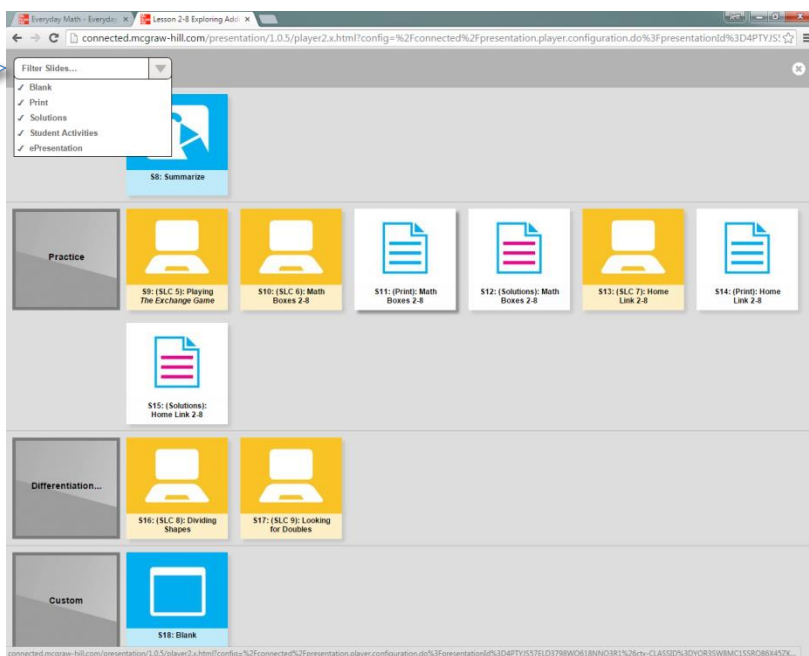

Filter Slides

Within the Grid View, you can hide certain types of slides to customize the ePresentation to your classroom's needs. Click on the "Filter Slides" dropdown at the top left of the window to see the 6 slide type filters.

If the checkmark appears next to the slide type, that type of slide is included in the ePresentation.

Clicking on a filter removes the checkmark, and hides all slides of that type. You might use this if you do not want the slide with the solutions (i.e. the answers) to show.

You can choose which types of slides you do or do not want to show by clicking to remove or select the checkmark.

Filter Slide Types:

Blank: Blank slides can be used to create your own content using the pen, text, and line tools.

Print: Slides that show what students would see in their print resources (Math Journal, Math Masters, Activity Cards, etc.) for this activity.

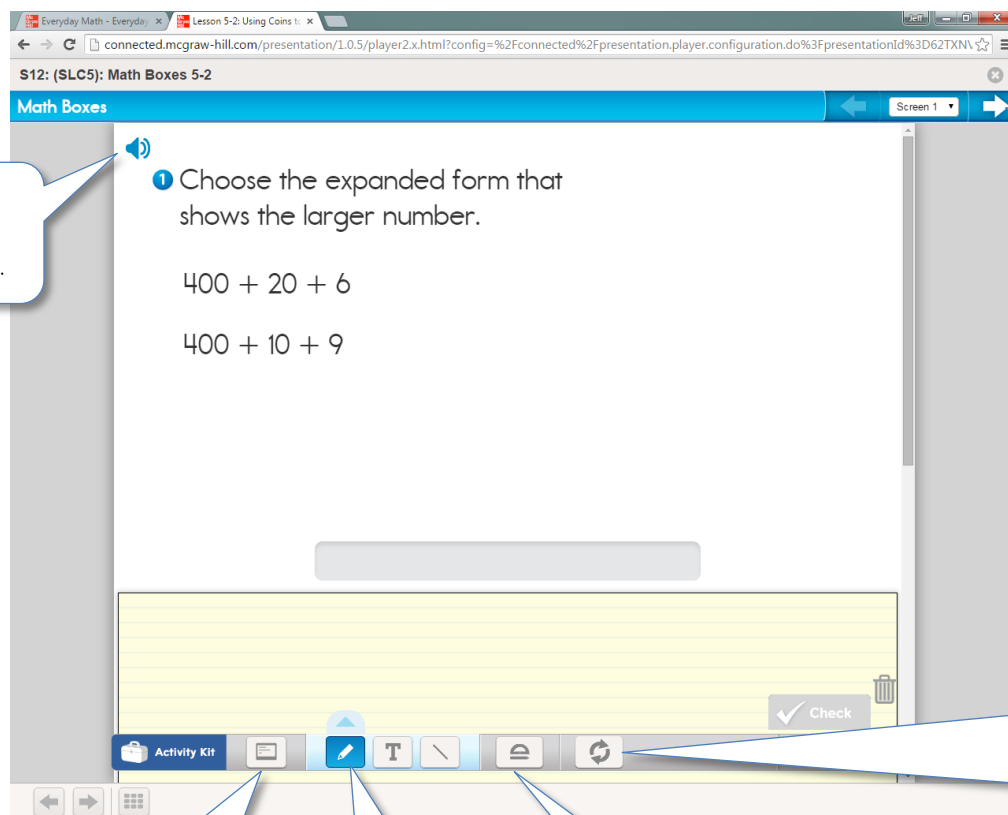

Solutions: Slides that show student print resources, with the answers shown.

Student Activities: Slides that show student digital activities available in the Student Learning Center.

ePresentation: Slides only available in the ePresentation for class instruction.

ePresentation Tools

Once you launch a slide, you can use the eTools or Writing Tools that are available for that slide. Depending on the content of activity, different eTools are available.

Click the **Speaker** icon to hear the instructions for the activity read aloud.

Sometimes slides have more than one screen. Navigate between them here.

Clear
Click to clear some or all of your interaction with the activity.

You can clear:

- Activity/Workspace
- Writing
- eTools

Workspace button

Click to access the workspace and interact with any capabilities unique to the workspace such as fill-in the blank, drag and drop, etc.

The green shade indicates the workspace is active.

Writing Tools

Click a writing Tool to access the Pen Tool, the Text Tool, or the line tool.

The blue shade indicates a writing tool is active.

eTools

Click the eTools icon to activate the eTools palette and the many options available for each eTool.

The orange shade indicates the eTools are active.

eToolkit

If you would like to launch the full eToolkit, click the Activity Kit in the bottom left, and the eToolkit will open in a new tab or window, with access to all tools in the eToolkit.
