INTERNET - APPROPRIATE USE

The Pleasant Valley Community School District believes Technology is a vital part of the school district curriculum. The Internet is available to employees and students. Appropriate and equitable use of the Internet allows employees and students to access resources unavailable through traditional means. Through the district online registration process, guardians will review, and confirm the annual online notices and technology use agreements.

~~an important aspect of student preparation is access to technologies which enhance learning. The goal of providing technology resources is to promote educational excellence by facilitating teaching and learning, research, production, innovation, communication, and collaboration. Parents who do not want their child to have access to the technologies provide by the district, must provide written notification to the building principal. Non-internet activities will be assigned to the student to complete work using a different modality.~~

~~The use of technology resources must be in support of the district's educational objectives. Access to various technology resources is available to users for academic-related purposes unless written notification is provided to building administration by parent/guardian. A 'user' includes, but may not be limited to the following: student, faculty, administrator, staff, volunteer, support personnel.~~

Beginning in ~~grade four~~ kindergarten, students will be issued email accounts via the district's Google domain, which will allow email to be sent only within the Pleasant Valley domain ~~and approved educational domains~~. ~~Communication will be accessible by the student's teacher at all times.~~ The District reserves the right to review or monitor, with or without prior notice, the content of electronic communication for any reason, including but not limited to retrieval of information, investigation or resolution of network or communications problems, prevention of system misuse, ensuring compliance with policies for use of third-party software and information, ensuring compliance with legal and regulatory requests and enforcement of this Policy. The District also reserves the right to review, inspect the content of, and monitor all information residing on all ~~computers~~ devices and file servers for such purposes.

The Internet can provide a vast collection of educational resources for students and employees. It is a global network which makes it impossible to control all available information. Because information appears, disappears and changes constantly, it is not possible to predict or control what students may locate. The school district makes no guarantees as to the accuracy of information received on the Internet. Although students will be under teacher supervision while on the network, it is not possible to constantly monitor individual students and what they are accessing on the network. Some students might encounter information which may not be of educational value. Student Internet records and access records are confidential records treated like other student records. Students' Internet activities will be monitored by the school district to ensure students are not accessing inappropriate sites that have visual depictions that include

obscenity, child pornography or are harmful to minors. The school district will use technology protection measures to protect students from inappropriate access, including sites that include obscenity, child pornography or are harmful to minors.

Student and Employee Internet activities will be monitored by the school district to ensure inappropriate sites that might include material that is sexually explicit, profane, obscene, harassing, fraudulent, racially offensive, defamatory or otherwise unlawful or harmful to minors. The school district will use technology protection measures to protect students and employees. People who utilize the district's technology resources are expected to abide by the principles of digital citizenship which are part of the curriculum.

~~At various times, information distributed by the Pleasant Valley School District and its employees may suggest educational web sites to assist students and parents with research, homework, curriculum enrichment or general information. These sites are not part of the district web site and are not under district control. The school district makes no guarantees as to the accuracy of information received on the Internet. When on these sites, it is possible to be directed to other sites that are no longer educational in nature or have commercial banners or advertisements. The Pleasant Valley Community School District does not endorse any commercial materials that may be advertised on any website. The Pleasant Valley School District is not responsible for the privacy practices of these outside sites. Although suggested sites have been evaluated, it is recommended that users read the individual privacy policy statements of each website when they leave the Pleasant Valley School District's website. While on district resources, a student or employee may encounter information which may not be of educational value.~~
